**Project Timeline:**

A. **September 15th:**

  ● Met to discuss app options and choose platform and language.

  ● Filled project information form.

  ● Created GitHub Repository

B. When the idea was approved by Professor Densmore, we started to familiarize with Swift and Xcode 11.2.1.

C. By **December 2nd** had a "Hello World App".

D. Meeting **December 2nd** to split the team in two and start working:

  ● User Interface: Samantha and Alexandra

  ● Back-end (Map API): Byron and Jean Marc

E. Before **December 6th** look into maps API and map functions, as well as have a design for the interface.

F. **December 6th** meeting with project mentor.

G. Meeting December 8th to start implementing the API and to start building the interface:

  ● Created a two tabbed app

  ● Created a single view app with the map

  ● Added text fields to the "user profile" tab and save button.

H. Meeting **December 10th**:

  ● Added timer to display notifications

  ● Added user prompt: Are you okay?

  ● Started to integrate Map API with user interface.

I. Meeting **December 11th:**

  ● Merged the map with the user interface

  ● All documentation docs were done, except the video
